

GLOBAL FORUM ON ENERGY SECURITY

2014

June 16-17, 2014

Beijing, China

Sponsored by:

Chinese Academy of Social Sciences (CASS)

Co-organized by:

Institute of Quantitative & Technical Economics (IQTE), CASS

Graduate School, CASS

Institute for the Analysis of Global Security (IAGS)

United States Energy Security Council (USESC)

Center for Studies on China's Circular Economy and Environment

1. Introduction

The global energy market is undergoing remarkable changes. In 2013, China surpassed the U.S. as the largest importer of oil, and its vehicle market has grown by 16 percent. At the same time wide spread pollution begs for a change in China's energy mix and its strategy for energy utilization. Cleaner energy has become a precondition to achieving continuous economic growth and global energy security.

The **Global Forum on Energy Security** promotes research and academic exchanges on energy security among policy makers, industry leaders and scholars to facilitate global collaboration on energy security and sustainable development. This year will mark GFES' third conference. In 2012 and 2013 the GFES focused on low carbon economy and shale gas respectively. The 2014 conference will focus on upcoming changes of energy security situation in Europe and Asia Pacific, as well as investment and finance of Clean Energy. We will also report effective policy recommendations to governments.

2. Topics and Call for Papers

- **Energy security and Policy in Asia and Pacific**
- **Energy Security in Europe and Russia**
- **Clean Energy**
- **Transnational Energy Investment**

Based on proceedings and papers presented at the forum GFES will compile and publish *Review on Global Energy Security 2014*. We call for papers in Chinese and/or English related to the topics of the conference. Papers can be sent for consideration to gfesbeijing@126.com before May 15, 2014.

3. Time

9 AM~16:30 PM
June 16-17, 2014 (Beijing Time)
